#### **A note on Manuel Linnares de Oliver the lawyer that attended this meeting:**

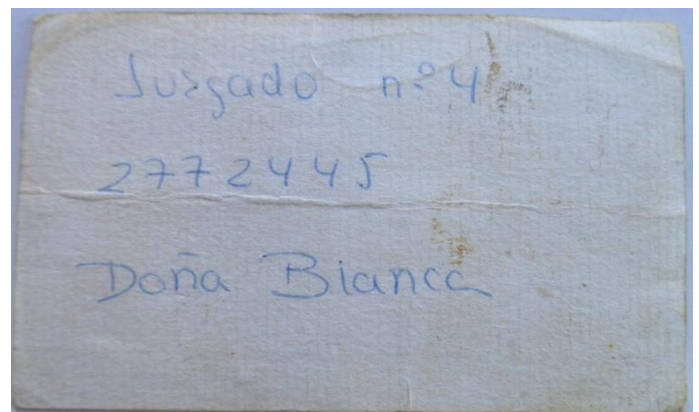

His name was Manuel Linnares he spoke English and the judge had got him to be my lawyer after countless complaints from me that I had no representation, I later found out (after I left prison) that he represented all Alan Wilcox's business interests in Spain (Alan Wilcox is the guy who killed Tor and launders money for the IRA with the British Drug Mafia) So I was set up by the judge with a bent Mafia lawyer!

I have since also found out that he had only become a lawyer just before being appointed my case, best guess is he's Judicial Mafia used by the Judge and maybe even Alan Wilcox to point it at me and let him go free.

Manuel Linares Abagado; Note i had the Judge Dona Blancas Private Number as i was a witness.

Written by her on the back of the lawyers card at the first meeting we had. This was so no one else could find out what was going on, as all the Prison governors thought she had lost her mind, they even called me in to their office to ask what she was doing, and pointed out it was all illegal.

This can be electro statically tested to date it and hand writing matched to the judge Dona Blanca.
